

4flow software.

Matthias, 4flow software

As an award-winning employer and specialist for logistics and supply chain management, 4flow unites consulting, software development, supply chain services, and research in one innovative business model. 4flow software enables the optimization and design of corporate networks with our integrated supply chain software solution 4flow vista®.

4flow is continuing its successful growth again this year. Grow with us and become part of our excellent team in Berlin, Germany as a:

Junior Software Product Manager

Your responsibilities

As part of a team, you will be responsible for the design and ongoing development of our 4flow software products. Your tasks will include the following:

- Contributing to the strategic optimization of our software solutions by serving as an interface between users and the internal software development team
- Developing technical concepts and requirement profiles for 4flow software products based on internal and external customer requirements
- Supporting the implementation of customer requirements through active participation in the agile software development process
- Creating and conducting user tests to improve the usability of our software
- Assisting with the implementation of software solutions at customer sites

Your profile

- Bachelor's or master's degree with a good grade point average in industrial engineering, science, computer science or a comparable course of study, ideally with a concentration in logistics
- Experienced user of MS Office with strong communication skills in English or German
- Passion for IT products and a strong interest in their design
- Practical experience or an internship in the area of IT consulting, supply chain, or for a manufacturer or software company would be preferable

We offer a challenging position with excellent opportunities for your personal development. Benefit from an experienced international team, award-winning company culture, and personally individualized training.
