

## Short bio:

Inês Marques is Assistant Professor at the Department of Engineering and Management of Instituto Superior Técnico (University of Lisbon) and Researcher at the Centre for Management Studies. Her main research areas focus on operations research for operations management, mainly to support planning and scheduling decisions and to improve health care services delivery. She works in several research projects in collaboration with health care service providers. She has published in international journals in the areas of operations research and management science. She is currently co-Coordinator of the European Working Group on Operational Research Applied to Health Services (EWG ORAHS) and member of the board of the European Working Group on Practice of Operational Research (EWG POR). She holds a degree in Mathematics Applied to Economics and Management, a MSc in Operations Research and a PhD in Statistics and Operations Research.
